

Determine variations or probability distributions
of input factors

```
graph TD; A[Determine variations or probability distributions of input factors] --> B[Create building energy models based on input variations]; B --> C[Run energy models]; C --> D[Collect simulation results]; D --> E[Run sensitivity analysis]; E --> F[Present sensitivity analysis results];
```

Create building energy models
based on input variations

Run energy models

Collect simulation results

Run sensitivity
analysis

Present sensitivity analysis
results
